

THE ULTIMATE BEACH ANCHOR!

Sandspike, LLC, well known for their innovative line of watercraft accessories, has developed the premier beach anchoring system on the market today. The tremendous holding power of their “Sandspike” is unsurpassed by the competition.

Acting as a temporary mooring bit, the unique design gives watercraft owners the strongest and safest way to anchor their craft on or off the beach. Unlike other beach anchoring systems the Sandspike is inserted flush to the ground. This concept allows it to have superior strength. It’s simple to use, just insert it into the beach, wiggle a bit and push. You will never have to hammer it in. It works on any type of beach, with the exception of solid rock. The Sandspike is indispensable when you want to visit a rocky or less “watercraft friendly” beach. It works just as effectively under the water, providing protection from nasty scratches, dings and expensive gel coat damage. As a matter of fact, you will have more holding power if it is inserted into denser wet sand as long as your watercraft is pulling in the opposite direction of the Sandspikes’ angle. In either case, when you’re ready to leave, it slides out easily. It is guaranteed to work!

Made of lightweight, anodized aircraft aluminum, it will never rust and is easy for anyone to handle. The sleek, compact design stores easily and there are no sharp points to damage your upholstery. Available in 3 sizes the “original” Sandspike will hold up to a 24’ watercraft, the medium size a 32’ and the largest one up to 42’, depending on conditions. There are five classic colors to chose from, one sure to be the perfect compliment to your watercraft.

Overwhelming response has been received by many top of the line watercraft manufacturers impressed with the Sandspikes’ exceptional quality. In fact one of the largest manufacturer’s of high performance ski boats in the world felt it met the rigorous standards of design and performance their company demands and is famous for. They

liked and believed in the product so much that they approached Sandspike LLC with a special request. The manufacturer wanted to be able to offer Sandspikes to their customers, branded with their own company logo. This manufacturer now sells them to customers purchasing their brand of boat as a fundamental way to protect their investment. Additionally, watercraft owners of all types, from the pro wakeboard rider to the weekend fisherman give the Sandspike rave reviews.

Enjoy the freedom that the Sandspike provides. With all the great beaches out there, you'll never again have to hope there is something for you to tie up to. And you'll do it in style.

Visit www.sandspike.com for information on getting your own Sandspike and check out their other great line of products.
